DETAILED ACTION

1. Applicant's election with traverse of Claims 1-17 in Paper dated 06/12/2003 is acknowledged. The traversal is on the ground(s) that the method could be employed but it would not produce the claimed product and that the claimed product is an improvement over the construction described on Page 5 in that, as set forth in Claim 1, there is a flame retardant coating intermediate to the conductive metal layer and the polymeric fabric substrate. The method proposed by the Examiner, disposing the metal layer directly on the fabric substrate, would not produce the claimed article.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 is drawn to a flame metalized fabric, classified in class 442, subclass 059+.
- II. Claims 18-20 is drawn to a method of forming a flame retardant conductive polymeric fabric, classified in class 427 in various subclasses.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the flame retardant coating could be applied to the fibers prior to them being formed into the fabric and could still formulate the final product.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1771

5. A telephone call was made to Mr. Stephan Salai on 12/04/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ms. Arti Singh whose telephone number is 703-305-0291. The examiner can normally be reached on M-F 8:00am to 6:00 pm.
